CLOUD TRANSCRIPTION KIT

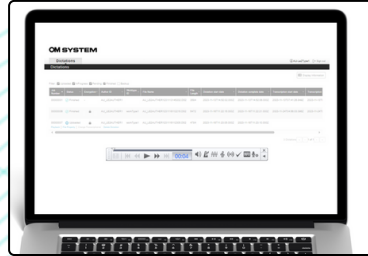

AS-9100

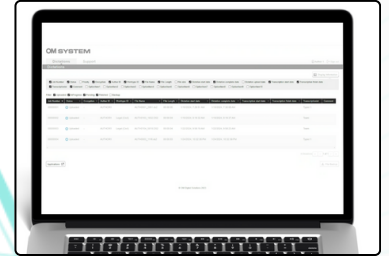

CLOUD TRANSCRIPTION KIT

Includes 12 month subscription to ODMS Cloud

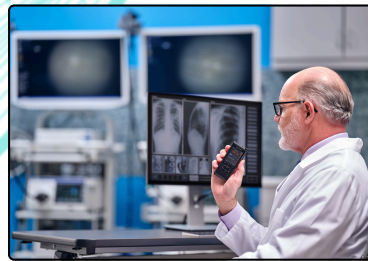

Comprehensive playback features

Streamlined Organization & Filtering

Secure online storage with audio file decryption

Instant cloud sharing between Authors and Transcriptionists

Support for Windows Edge, Google Chrome, and MacOS Safari

The AS-9100 transcription kit includes everything needed for seamless digital dictation file transcription. It comes with a 1-year license for ODMS Cloud transcription software, a 4-pedal foot control, and headphones. This hands-free solution allows instant playback and control of DSS, WAV, and MP3 files through the locally installed Desktop App. The ODMS Cloud system enhances collaboration between transcriptionists and authors, offering easy access to dictation files from anywhere, anytime. Securely stored online, it eliminates the need for a dedicated server, simplifying setup for swift and effortless operation.

- Record, share, transcribe: anywhere.
- Play, rewind, and fast forward audio files. Speed control options ranging from 50% to 200%.
- Compatible with DS2, DSS, WAV, and MP3 audio formats.
- Always-on synchronization with secure online storage powered by Microsoft Azure.
- ODMS Cloud supports Microsoft Edge, Google Chrome and Safari.
- Automatic routing options between Authors and Transcriptionists.
- Include a 12 month subscription license to ODMS Cloud, 4-switch foot control & headphones.
